Message from the Guest Editors

Dear Colleagues,

Malignant tumours are among the most prevalent diseases worldwide. An early, correct and complete diagnosis of the initial disease or recurrence, followed by appropriate and personalized treatment, can significantly reduce mortality, physical morbidity and psychological distress in affected patients. For many tumour entities, pathology represents the diagnostic "gold standard" in order to reach the diagnosis, ensure staging, and predict prognosis or the response to treatment.

The Special Issue will be devoted to advances and best practice in diagnostic pathology for cancer evaluation. The topics broadly include, but are not limited to:

- **Tissue investigation in cancer diagnostics and treatment**
- **The problems and solutions in the morphological diagnostics of rare tumours**
- **Digital pathology**
- **Molecular pathology**
- **Ancillary studies and the future of diagnostic tumour pathology**

Original articles and reviews are welcome. Interesting images are welcome as an attractive form of scientific article; however, these should be supplemented by a scientifically sound literature review ensuring a representative insight in the given pathology.

Special Issue

Editor-in-Chief

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
