Message from the Guest Editor

The past decade was eventful in terms of diagnostic and therapeutic advances in the field of gynaecological cancer. Targeted therapies have emerged in cervical, ovarian, and endometrial cancers in the past few years, becoming standards of care in international guidelines, with more and more information gained on the genetic background of these diseases. The deeper understanding of the molecular level of these tumours started a breakthrough in the diagnostic, prognostic, and therapeutic approaches.

The topics of this Special Issue should focus on, but are not limited to, the following:

New biomarkers of screening and early detection in gynaecological cancers;

New biomarker-driven targeted treatment in gynaecological malignancies;

Preoperative assessment of gynaecological cancers;

Surgical treatment of gynaecological cancers;

The role of the microbiome in gynaecological cancers;

Prognostic and therapeutic relevance of DNA repair defects;

Gynaecological cancer and thrombosis.

Submissions of original preclinical or clinical papers contributing to the advances in this field, as well as reviews, are encouraged.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
