Message from the Guest Editor

Dear Colleagues,

Colorectal cancer (CRC) is a common gastrointestinal cancer that has a high mortality rate, posing a serious threat to human health. Many CRCs are caused by the malignant transformation of colorectal polyps. Therefore, early diagnosis and treatment are generally considered to be the most effective ways to reduce CRC mortality.

This Special Issue aims to improve our knowledge of recent advances in the diagnosis and treatment of CRC. Submissions may include articles reporting on current original research, experimental methodology, and the introduction of new devices and review articles summarizing the current status of biomarkers or images for pathologic diagnosis and management of CRC. I look forward to receiving your contributions.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
