Message from the Guest Editor

Dear Colleagues,

Recent advances in the understanding of ocular neurodegenerative diseases have greatly improved diagnostic methods. This Special Issue focuses on the convergence of genetic testing and clinical/instrumental approaches, providing invaluable insights into the characterisation of these disorders. Genetic testing plays a crucial role in identifying genetic variants and improving our understanding of disease mechanisms. At the same time, clinical and instrumental approaches provide a comprehensive understanding of phenotypic manifestations, enabling early diagnosis and personalised treatment strategies. This interdisciplinary approach not only refines diagnostic precision, but also paves the way for targeted therapeutic interventions. By unravelling the complex interplay between genetic factors and clinical manifestations, this Special Issue contributes to a better understanding of eye diseases and describes advances in diagnostic practice.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
