### Message from the Guest Editor

Dear Colleagues,

The aim is to publish high-quality papers on the up-to-date diagnostic and therapeutic modalities in trauma and emergency medicine. This will also address the guidelines and recent stepwise approach as well as the multidisciplinary approach in traumatic injury and acute medical and/or surgical settings. Personalized medicine and genetic background in emergency conditions also fall in the scope of this issue. The role of artificial intelligence/machine learning in acute medical and surgical conditions will be addressed. Bioclinical markers in trauma and emergency situations are also hot topics for research.
