Message from the Guest Editor

Dear Colleagues,

Inflammatory pathologies, which generally refer to chronic inflammatory conditions, represent a significant problem in healthcare today. According to the World Health Organization, chronic inflammatory diseases are among the greatest threats to human health. These conditions not only cause significant morbidity to patients, but also exert a huge burden on healthcare systems worldwide. The projected number of patients suffering from these conditions is likely to increase in the coming decades. It is imperative that we have an enhanced understanding of the underlying reasons for this surge in inflammatory pathologies.

There have been significant advances made in recent decades regarding the management of these conditions, such as novel biomarkers, immunotherapies, and newer diagnostic tools. Further research into preventive measures, early diagnostic techniques and management are necessary to tackle the expected surge in the coming years.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
