Deadline for manuscript submissions:

closed (31 August 2024)

Message from the Guest Editor

CT imaging is now widely used in clinical disease diagnosis, treatment planning and patient positioning in radiation therapy, and preclinical imaging of various animal models. The new era of CT imaging has been undergoing a paradigm shift from anatomy-based methods to quantitative and prognostic diagnosis imaging. The integration of modern CT imaging with advanced computing tools such as radiomics and machine learning has made individualized medicine a potentially attainable goal. However, challenges and technical difficulties remain. These issues include access to the diverse and huge data sets from multiple healthcare institutions and independent clinical validation of predictive models. We cordially invite contributions on CT-related research from scientists and clinical physicians across diverse fields.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
