Evangelismos Hospital, 10646
Athens, Greece

Deadline for manuscript
submissions:

30 November 2024

Message from the Guest Editor

In the era of precision medicine, histopathology has continued its rapid pace of development in the field of understanding cancer biology. An accurate diagnostic approach is of great importance now more than ever. New diagnostic tools are being incorporated into daily practice, with important implications for patient care and prognosis, while prognostic and predictive markers, as well as molecular techniques, are being incorporated into histology reports. This Special Issue represents an opportunity to gather pathologists and researchers to share their research results or documented reviews dedicated to advanced diagnostic approaches, from biomarkers and genetic/molecular tests to more complex techniques. Therefore, we wholeheartedly invite pathologists and investigators to submit their original research articles, review articles, and case reports to our Special Issue.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
