submissions:

**closed (15 November 2023)**

### Message from the Guest Editor

Dear Colleagues,

The aim of this Special Issue is to present the multiparametric imaging used to evaluate focal and diffuse liver pathology, as well as the transplanted liver with an emphasis on advanced imaging techniques (such as spectral computed tomography, CT perfusion of the liver, functional MRI, MR elastography, mapping T1 and T2), hepatocytic specific contrast material, and imaging biomarkers. Further, this Special Issue will highlight the key points used for rapid and correct imaging diagnostics, the role of interventional radiology in liver tumor treatment and liver transplant complications, as well as the role of a multidisciplinary team in the management of patients with liver disease or with liver transplantation.

Prof. Dr. Ioana Gabriela Lupescu

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
