submissions:

closed (29 February 2024)

Message from the Guest Editor

Cystic fibrosis (CF) is a common genetic disease caused by the defective production of CFTR protein. Understanding the basic genetic defect of CF enabled new treatment modalities including CFTR modulators in the developed countries. In the developing world, CF remains a problematic situation especially with regard to the diagnosis of the disease. Limited access to sweat testing in many parts of the world creates an inequity in the management of the disease worldwide. Genetics, which is the main part of the diagnosis, is evolving with many variants with unknown significance. In addition to this, management of CF in the centres, transition to adulthood care are other issues waiting to be resolved in many countries. The primary aims of this issue, Diagnosis and Management of Cystic Fibrosis; are to define the diagnostic difficulties, discover new diagnostic opportunities in CF, discuss the evolving genetic methods and the problems in the management of CF, as well as the transition to adulthood programs. Also, to review the recent situation in the therapeutic regimens including CFTR modulators are under the scope of this issue.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical
Physiology, Nuclear Medicine &
PET National University Hospital,
Rigshospitalet, University of
Copenhagen, Blegdamsvej 9, DK-
2100 Copenhagen, Denmark

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
