Message from the Guest Editors

Dear Colleagues,

At present, some malignant and other aggressive bone tumors are challenging to properly manage. Proper decision making is required during diagnosis and treatment. To find reliable answers, consensus meetings, clinical trials, and big data studies are conducted, and many of the latest diagnostic and treatment techniques are applied. Nevertheless, there are still many obstacles to overcome for such rare diseases. This Special Issue aims to present a collection of advanced studies from a basic, translational, and clinical perspective that helps determine the diagnosis and treatment of bone tumors. We welcome your contributions on, but not limited to, the following topics:

- Aneurysmal bone cysts;
- Giant cell tumor of bone;
- Polyostotic fibrous dysplasia;
- Langerhans cell histiocytosis;
- Osteofibrous dysplasia;
- Adamantinoma;
- Atypical cartilaginous tumors;
- Chondromyxofibroma;
- Osteosarcoma;
- Chondrosarcoma;
- Ewing's sarcoma.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
