### Message from the Guest Editor

Pancreatic diseases include diabetes mellitus, exocrine pancreatic insufficiency, cystic fibrosis, pseudocysts, cysts, congenital malformations, pancreatic cancer, etc. The pancreas has a special anatomical location in the human body, adjacent to major organs and blood vessels such as the liver, duodenum, stomach, and spleen, which makes local treatment methods such as surgery and radiotherapy very difficult. Therefore, the early diagnosis of these diseases is critical for effective treatment and improved patient outcomes. However, pancreatic cancer often has an insidious onset and non-specific clinical manifestations, making early diagnosis even more difficult.

In this issue, we aim to highlight the latest diagnostic techniques and advances in imaging technology, biomarkers, and genetic testing that enhance the accuracy and timeliness of pancreatic disease diagnosis. We are looking forward to accepting original research and review articles dealing with these and related areas. We hope to promote the development of the diagnostic level of pancreatic diseases through the efforts of researchers and clinicians, so that patients can achieve a better prognosis and quality of life.

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
