Message from the Guest Editors

Dear Colleagues,

Hepatocellular carcinoma (HCC) ranks fifth in cancer incidence and third in cancer mortality worldwide. Hepatitis virus, alcoholism, and NASH have emerged as key factors for HCC development. However, HCC occurrence remains unpredictable, and many issues regarding its natural history are still elusive. The goal of this Special Issue is to discuss the diagnosis and prevention of HCC from many points of view, including HCC without precancerous condition, combined hepatocholangiocarcinoma, cholangiolocellular carcinoma, AI diagnosis of HCC, and new screening systems for HCC. It seems to be extremely valuable to have a thorough understanding of HCC from many different angles, in order to provide new hints for upcoming research.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
