Deadline for manuscript submissions: closed (30 June 2022)

### Message from the Guest Editor

Dear Colleagues,

In vivo magnetic resonance spectroscopy (MRS) is an imaging modality that can be used to non-invasively provide biochemical and metabolic information. In spite of a history of about 30 years of in vivo application of MRS, it has not been established as a widespread clinical tool. This Special Issue will describe already existing clinical and research applications of in vivo MRS, in particular those where MRS can aid with clinical diagnosis and decisionmaking. Topics for such applications include psychiatric disorders and neurodegenerative diseases, tumor metabolism and cancer, traumatic brain injury, metabolic diseases, and pediatric disorders. Finally, methodological developments that could promote the application of MRS should be emphasized.

Dr. Ralf Mekle *Guest Editor*

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
