

AI and Medical Imaging in Breast Disease

Guest Editors:

Dr. Karen Drukker

Prof. Dr. Lubomir Hadjiiski

Dr. Despina Kontos

Dr. Marco Caballo

Dr. Shandong Wu

Message from the Guest Editors

This Special Issue is intended to provide an overview of the development of AI in clinical breast imaging. The primary aim is to provide an overview of exiting new applications of both ‘conventional’ methods—using human-engineered radiomics features—and deep learning AI algorithms involving all aspects of imaging-based patient care for breast disease. The secondary aim is to provide a resource for researchers to help to identify and mitigate potential pitfalls in the translation of their breast imaging AI applications to clinical practice.

Deadline for manuscript
submissions:

closed (31 December 2022)

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
