Message from the Guest Editor

Dear Colleagues,

In recent decades, there have been rapid advances in the molecular diagnostics of malignancy, including lymphoma. This has led to the publication of an integrated WHO classification system for lymphoid malignancy incorporating clinical, morphological, immunophenotypic and molecular genetic data. This Special Issue seeks expert review and primary research articles on recent advances in the molecular diagnostics of lymphoma which include future perspectives/directions.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
