Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editor

Severe pneumonia is a common disease that can be associated with frequent hospitalization and poor outcomes. A rapid diagnosis and a correct initial management may improve the prognosis of this condition. Non-invasive mechanical ventilation is a valid therapeutic option in the first phases of the stabilization of severe pneumonia. The use of steroids appears to be a possible adjunctive treatment for some patients. Some new issues have occurred which need to be clarified in terms of patients with severe pneumonia with ARDS.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
