Message from the Guest Editors

Many important organ systems, e.g., the hepatobiliary–pancreatic, gastrointestinal and genitourinary ones, are located in the abdomen, which can be affected by heterogeneous diseases, such as malignant and benign tumors and common and rare, acute and chronic non-neoplastic diseases. Imaging is used to initial diagnoses, which can be challenging sometimes. Moreover, it is pivotal for staging and treatment planning. The complexity of patients' anatomy and of the diseases that can affect it and the increasing capabilities of state-of-the-art imaging and post-processing require the interpreting physician to be an expert. The role of radiomics and artificial intelligence in imaging is growing, and it is expected to grow even more in the near future. Therefore, radiologists and nuclear medicine physicians play an important role in managing patients.

In this Special Issue, we invite original research papers and comprehensive reviews on all aspects of abdominal imaging, from conventional and advanced imaging to post-processing, artificial intelligence and prognostication.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Medicine, General & Internal*)
