Message from the Guest Editors

Diagnosis of mesothelioma is challenging, as it can be suspected with imaging, but it has to be confirmed with biopsy. Conventional cytology has several limitations, although immunohistochemistry has enhanced its accuracy. Immunohistochemistry is crucial in differentiating mesothelioma from neoplastic mimics.

An interdisciplinary approach involving a team of healthcare professionals including molecular biologists, pathologists, radiotherapists, oncologists, and surgeons is essential to diagnose mesothelioma, and to evaluate the benefits and burdens of various therapies in order to provide the best care for this disease.

Accordingly, in this Special Issue, it is intended for researchers cooperate to evaluate and discuss new research developments of diagnostic methods that may lead to a prompt and precise diagnosis, which may help physicians deal with this disease.

In this Special Issue, the following topics will be presented: histopathology, cytopathology, genetics of malignant pleural mesothelioma, mesothelioma biomarkers, pleural mesothelial hyperplasia, invasive and non-invasive staging and surgical diagnosis of malignant mesothelioma.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
