### Message from the Guest Editors

Dear Colleagues,

Several approaches have been proposed in recent decades to improve medical decision systems' robustness. The advent of AI-enabled healthcare data analysis may result in the accurate detection and prevention of diseases. Several machine learning and deep learning models have been proven to be responsive to medical image data to detect cancer and severe diseases promptly. This Special Issue's primary purpose is to cover the theoretical applications of several AI algorithms, i.e., machine learning, deep learning, and their advanced variants for medical image processing. We intend to present a rational platform for researchers and scientists in academia and engineers to present their most recent research results in medical image processing and disease diagnosis.

Topics of interest include, but are not limited to, the following:

- Convolutional neural networks;
- Deep learning;
- Medical image processing;
- Artificial intelligence for health care disease diagnostics;
- Machine learning;
- Health care data analytics;
- Optimization in medical image processing;
- Evolutionary computing.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
