Message from the Guest Editor

Dear Colleagues,

Optimum twenty-first century cardiology practice is based, in most cases, on cardiovascular imaging. Various non-invasive imaging techniques, including echocardiography with its multiple modalities, cardiac magnetic resonance, myocardial perfusion tomography and CT coronary artery scanning, have become the cornerstone for accurate diagnosis. In addition, Doppler vascular scanning has also become essential for various arterial syndromes, as well as an aid in routine atherosclerosis prevention clinics. This Special Issue of the *Diagnostics* journal aims to attract high-quality articles, both original and review, in the field of cardiovascular imaging. Combining such a wealth of knowledge in one Issue will be a great educational tool, particularly in broadcasting recent imaging advances.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
