Message from the Guest Editor

Dear Colleagues,

Recent times have seen exponential advances in the diagnosis and management of gastrointestinal diseases. Researchers and scientists across the globe have helped in improving the diagnostics of various gastrointestinal diseases such as inflammatory bowel disease, acute and chronic pancreatitis, and gastrointestinal malignancies. The issues of importance include the differentiation of these and other gastrointestinal diseases from their mimics. Once diagnosed, it is crucial to prognosticate about the outcomes and intervene early to improve the outcomes of these diseases. This Special Issue will cover areas including

- Pancreatic diseases
- Biliary diseases
- Luminal diseases

We invite original work and reviews that report developments in improving the diagnosis and prognostication of gastrointestinal diseases.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
