Message from the Guest Editor

The incidence of gynecological cancers is rising, and healthcare professionals need to be informed about the latest data regarding the constant developments in the field of its management. Wide-scale genome studies have contributed to a better understanding of carcinogenesis in gynecological cancers and the integration of molecular biomarkers into international risk stratification systems.

This Special Issue aims to provide an up-to-date and detailed picture of this area by gathering contributions that cover aspects related to the field of Gynecological Oncology, answering fundamental questions from recent advancements in both surgery and research, to clinical trials and applications.

The primary goals of this Special Issue, entitled “Clinical Diagnostics and Pathology in Gynecological Cancer” are to describe new and established diagnostics; to discuss approaches to complex clinical situations; and to review new research developments in the field of Gynecological Oncology.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
