Message from the Guest Editors

Dear Colleagues,

Heart failure prevalence continues to rise globally despite current advances in diagnostics and management. Regardless of the underlying etiology, heart failure remains a progressive disease, largely irreversible and end-stage heart failure requires transplantation. This Special Issue focuses on the challenges and recent advances of diagnosis (biomarkers, imaging), treatment, and prevention of heart failure and associated comorbidities (COPD, diabetes mellitus, sleep apnea, renal insufficiency). Of particular interest, are the influence of lifestyle alterations (diet, exercise, bodyweight) on heart failure progression/outcomes and improvement of quality of life. Authors can submit original articles, reviews, or short communications. We welcome submissions from clinical, translational, and basic research.

Prof. Dr. Inna P. Gladysheva

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
