Message from the Guest Editor

In this Special Issue, we encourage authors to submit original research papers or review articles presenting novel results on the following topics:

- Screening and diagnostic methods for ‘primary’ and ‘secondary’ hypertension.
- Diagnostic instruments for early identification of hypertension-mediated organ damage, including vascular remodeling, heart remodeling, renal impairment, cerebrovascular disease (e.g., measuring arterial stiffness, new markers of hypertension nephropathy).
- Recent findings in the treatment of hypertension: Are there new potential treatments? What about renal denervation and sympathetic activity modulation?
- New evidence on the workup (diagnosis and treatment) of resistant hypertension.
