Department of Radiology, Columbia University Medical Center and New York Presbyterian Hospital, New York, NY, USA

Prof. Dr. Nicolas Aide
INSERM 1199 ANTICIPE, Normandie University, Caen, France

Dr. Laetitia Vercellino
Department of Nuclear Medicine, Saint-Louis Hospital, AP-HP, Paris, France

Deadline for manuscript submissions:
closed (31 March 2022)

Message from the Guest Editors

In the new era of precision medicine in oncology, medical imaging is pivotal for the management of patients with melanoma. Imaging guides a wide range of indications ranging from early detection of malignant lesions to response assessment in advanced metastatic disease. This Research Topic aims to share disruptive concepts in the field of imaging-guided precision medicine in patients with cutaneous, mucous or uveal melanoma. The goal is to discuss new concepts and discoveries in the field of quantitative imaging biomarkers derived from a quantitative analysis of data contained in medical images such as guiding the initial treatment decision, assessing tumor sensitivity to treatments, and managing patients in the new era of COVID-19.

Special Issue

Editor-in-Chief

Prof. Dr. Andreas Kjaer
Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
