submissions:

**closed (31 July 2022)**

### Message from the Guest Editor

Dear Colleagues,

The wide array of knee problems, including meniscal injury, ligament injury, malalignment, osteoarthritis, and fracture, produce varying degrees of challenges to surgeons. Management of these problems should be based on proper diagnosis. Although the multidisciplinary team approach is essential for patients with such problems, orthopedic knee surgeons should be attuned to proper diagnosis and treatment for each problem.

For this Special Issue titled “**Management of Knee Problems Based on the Proper Diagnostic Procedures**”, we would like to invite authors to submit their original papers or review articles on specific and novel approaches for the diagnosis and management of knee problems. These can include all territories such as injury mechanism, diagnosis, conservative treatment, and surgical treatment. However, we are particularly interested in works based on proper diagnosis.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
