Message from the Guest Editors

Dear Colleagues,

According to the recent World Health Organization (WHO) classification, brain tumors include a variety of different tumor types originating from the central nervous system. Furthermore, the brain may be involved in the metastatic spread of tumors arising from other anatomical sites.

Imaging methods may be extremely useful for diagnosis, monitoring, treatment response assessment, and for obtaining prognostic information in patients with brain tumors.

This Special Issue aims to gather articles concerning advanced imaging techniques in brain tumors. This includes, but is not limited to, advanced magnetic resonance imaging (MRI) techniques and positron emission tomography (PET) with different radiopharmaceuticals.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
