### Message from the Guest Editors

Topics of interest include, but not limited to:

1. Development and standardization of microfluidic devices for POC diagnosis;
2. Integration of microfluidics-based POC results with electronic medical records;
3. Advancements in biosensors for multiplexing and the simultaneous detection of multiple analytes;
4. Clinical validation and implementation of microfluidics-based POC diagnostic devices;
5. Cost-effectiveness and user-friendliness of microfluidic POC devices for widespread use;
6. The impact of the COVID-19 pandemic on the growth of the microfluidics-based POC detection market;
7. The potential of microfluidics-based POC detection to monitor chronic diseases and early intervention;
8. Advancements in sample preparation techniques for microfluidics-based POC diagnosis;
9. The integration of artificial intelligence and machine learning in microfluidics-based POC detection.

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
