submissions:  
**closed (30 June 2022)**

### Message from the Guest Editors

Pathologies of the musculoskeletal system can and must be addressed by many professionals such as orthopedists, traumatologists, physiatrists, physiotherapists, rheumatologists, geriatricians, radiologists, biologists, biotechnologists, bioengineers and other doctors, health professionals, and basic scientists. Their interaction in a multi- and transdisciplinary approach is very important.

The aims of this Special Issue are: (1) to summarize through literature reviews, possibly systematic or meta-analyses, the state of the art of the most interesting and current problems of the musculoskeletal system; (2) offer the most current and innovative research through original articles.

Both basic science and clinical papers are welcome as long as they concern diagnostic or therapeutic aspects of the musculoskeletal system.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
