Message from the Guest Editors

Dear Colleagues,

Vascular imaging is one of the most important topics within medical imaging, as assessment of blood flow in vessels and perfusion to organs can separate healthy from diseased patients. In the daily work of an imaging specialist, flow and perfusion evaluation is a crucial part of the exam, whether using X-ray, CT, MRI or ultrasound.

In this Special Edition, the focus will be on new trends of vascular imaging. Many new exciting imaging techniques have in recent years been introduced in this research field, such as advanced ultrasound methods, dual energy CT, and new MRI sequences.

The focus will be on clinical or preclinical papers dealing with in vivo examinations using new imaging techniques for diagnosing and assessment of flow and perfusion in healthy and/or diseased patients.

Dr. Kristoffer Lindskov Hansen

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
