Message from the Guest Editor

Dear Colleagues,

We are pleased to invite you to publish in the Special Issue entitled Diagnosis and Management of Gynecological Cancers. In this issue, we are focusing on molecular diagnostics, medical screening, prognosis, and artificial intelligence in diagnostics, in order to cover the past, present and future of gynecological cancers and understand how the most advanced technologies are improving the molecular detection and management of these cancers.

Research areas may include (but are not limited to) the following:

The history of gynecological cancers: diagnosis and management;

Targeted therapies for genomic instabilities (GIs) in gynecological carcinomas;

The molecular classification of uterine sarcomas using NGS for RNA;

DNA methylation profile for the molecular classification of uterine mesenchymal neoplasia;

The use of AI in diagnosis and management.

We look forward to receiving your contributions.

Dr. Luiz Gustavo De Almeida
