submissions:  
**closed (31 March 2022)**

### Message from the Guest Editor

Dear Colleagues,

Maxillofacial trauma is very common worldwide, with a different prevalence in different countries. It often represents urgencies or emergencies, and imaging is crucial for diagnosis, surgical planning, and postoperative evaluation. Over the years, imaging techniques have evolved from simple radiographs such as orthopantomography to 3D CT reconstructions, up to intraoperative navigation and the design of custom-made plates. The main purpose of this Special Issue is to share the technological development of imaging to allow a better management of trauma.

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
