Message from the Guest Editor

Dear Colleagues,

We cordially invite you to contribute to this Special Issue of Diagnostics, which is dedicated to children and adolescent orthopedics.

The importance of assessing health status in pediatric patients with orthopedic diseases is well known. Discovering new methods and surgical techniques to avoid extensive injuries in pediatric patients is mandatory. The development of new technologies gives the possibility to treat these patients, reducing postoperative pain and psychological distress. However, surgery is not the only focus of pediatric orthopedics. The monitoring of the psychological status of the patient and the caregiver plays a crucial role in children's rehabilitation. In fact, the psychological aspect of the disease is crucial, more so in children than in adults, and therefore surgery is not the only avenue to be explored. New diagnostic tools may allow for the discovery of diseases in their early stages, helping to avoid the necessity of surgical treatment in many cases.

This Special Issue aims to emphasize new diagnostic methods, surgical techniques, and possible treatments for the major pediatric orthopedic diseases.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
