submissions:

31 August 2024

Message from the Guest Editors

Dear Colleagues,

Alzheimer's Disease (AD) is an age-related neurodegenerative disorder causing severe disability and important socio-economic burden with no cure available to date. Therefore, the early detection and prevention of Alzheimer's disease (AD) is important. The precise definition of the diagnosis and of the progression of the disease is paramount to understand how and when to act to prevent and treat neurodegeneration.

This Special Issue offers an open-access platform that aims to bring together a collection of original research and review articles addressing novel biomarkers, techniques, and approaches that will be valuable and helpful for the diagnosis or treatment of Alzheimer's disease and other neurodegenerative diseases.

We look forward to receiving your contributions.

Dr. Carlo Gabelli

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
