Message from the Guest Editor

Dear Colleagues,

Arthroscopy is an advanced technology that uses microcamera systems and optical principles to observe, diagnose, and treat intra-articular lesions. With the continuous development of medical technology, arthroscopy technology is increasingly used in fields such as orthopedics, sports medicine, and rheumatology. Arthroscopy technology can directly observe the structures within joints, help doctors accurately diagnose joint diseases, and can perform surgical treatment under direct vision, thereby improving the treatment effect and patients' recovery speeds.

The aim of this Special Issue is to collect papers regarding the applications of arthroscopy technology in diagnosis and treatment. I look forward to receiving your contributions.

Dr. Jae-Sung Yoo

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
