Message from the Guest Editor

The Special Issue offers a deep exploration of the latest advancements in cancer biomarker research. It covers various topics, from discovering and validating novel biomarkers to their application in cancer diagnosis, prognosis, and treatment. The issue highlights the potential of biomarkers in improving early detection and personalized medicine for various types of cancer. We welcome contributors from diverse backgrounds, including oncology, genetics, and proteomics, to share their insights and expertise on the latest trends and challenges in the field. This Special Issue is a valuable resource for researchers, clinicians, and patients interested in understanding the role of biomarkers in cancer management and the future directions of this exciting area of research.

We welcome you to submit original research, comprehensive reviews, systematic reviews, brief reports, communications, interesting images, etc.
