Unit of Interventional and Diagnostic Ultrasound of Internal Medicine, IRCCS Fondazione Casa Sollievo della Sofferenza, 71013 San Giovanni Rotondo, Italy

**Dr. Carla Maria Irene Quarato**

Department of Respiratory Diseases, Policlinico Universitario "Riuniti" di Foggia, Foggia, Italy

**Prof. Dr. Beatrice Feragalli**

Department of Medical, Oral and Biotechnological Sciences, G d'Annunzio University of Chieti-Pescara, Chieti, Italy

Deadline for manuscript submissions:

**closed (30 April 2024)**

### Message from the Guest Editors

Thoracic Ultrasound (TUS) has proven to be an important auxiliary diagnostic tool in the diagnosis of several pleuro-pulmonary disorders, with numerous advantages over traditional radiological imaging techniques (i.e., chest X-ray and chest CT scan). These advantages include being non-invasive and radiation-free, having a lower cost, the possibility of follow-up examinations, the ability to monitor treatment and its easy accessibility in all settings (including poor countries).

In recent decades, new sonographic technical innovations, such as contrast-enhanced ultrasound (CEUS) and sonoelastography, are becoming increasingly important in diagnostic imaging and interventional medicine. This Special Issue will focus on the recent advances in TUS, with particular interest on the advantages and limits of the diagnostic and interventional use of the new sonographic technical innovations in the study of chest diseases.

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
