Message from the Guest Editor

Medical diagnostics are the basis for therapeutic success in trauma surgery. Delayed and inaccurate diagnostics could lead to unnecessary pain, resulting in impairment and substantial economic burden. Therefore, diagnostics have an impact not only on individuals but also on healthcare systems. However, in the recent past trauma surgery diagnostics and the resulting management have improved and change is ongoing.

The primary goal of this Special Issue is to show the recent advantages in the science and practice of diagnostic and treatment modalities in trauma surgery. Therefore, it would be a great honor if you, as a leading scientist in the field, could contribute to this Special Issue, *Diagnosis and Management in Trauma Surgery*. It is our privilege and pleasure to invite you (or one of your coworkers) to submit an article on this topic.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
