### Message from the Guest Editors

Currently, the diagnosis of PCOS is carried out on the basis of existing internationally accepted guidelines and recommendations. However, many challenges regarding personalized prediction and early diagnosis remain extant. The interindividual variability of the features and comorbidities of PCOS depends on genetic factors, such as age, race and ethnicity, as well as on environmental factors, and current approaches for prognosis and diagnosis do not encompass all aspects of interest.

The Special Issue will include (but is not limited to) the following topics: prognostic and predictive patient-specific markers of PCOS and its comorbidities; ethnicity and the diagnosis of PCOS; the identification of new biomarkers of different PCOS phenotypes; age-specific aspects of biochemical hyperandrogenism; and advances in ovary ultrasound in PCOS diagnosis.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
