Deadline for manuscript submissions:

closed (31 October 2025)

Message from the Guest Editor

Special considerations are required for the evaluation of gastrointestinal pathology in the pediatric population. The spectrum of pediatric gastrointestinal tract disorders is broad, and the diagnosis often requires a different approach from that in adults. In addition, certain conditions (e.g., congenital enteropathies, monogenic inflammatory bowel disease) are rarely encountered, even at large pediatric centers. Thus, these specimens pose unique diagnostic challenges for many practicing pathologists. The aim of this Special Issue is to highlight recent advances in the field of pediatric gastrointestinal pathology. This Special Issue will also provide a practical overview of relevant disorders for pathologists and clinicians who diagnose and manage pediatric patients. Various types of articles on common and rare entities are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
