Imaging of Treatment Response in Advanced Lung Cancer

Guest Editor:

Dr. Farkhad Manapov

Department of Radiation Oncology, University Hospital, Ludwig Maximilian University (LMU) of Munich, Marchioninistrasse 15, 81377 Munich, Germany

Deadline for manuscript submissions:

closed (28 February 2022)

Message from the Guest Editor

For this research topic, we are interested in submissions addressing the morphological (imaging-based) and molecular-genetic characterisation of treatment response to multimodal therapy in advanced lung cancer. Studies concerning the implementation of new imaging protocols reporting on tumour volume changes in course of multimodal treatment, including chemotherapy and immune checkpoint inhibition combined with modern radiation treatment and surgery, are appreciated. All submission types supported by *Diagnostics* will be considered, with priority given to original research articles, reviews and editorials.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
