Department of Nuclear Medicine, Saint-Louis Hospital, AP-HP, Paris, France

Deadline for manuscript submissions:

closed (31 August 2023)

Message from the Guest Editors

Dear Colleagues,

In the new era of precision medicine in oncology, medical imaging is pivotal for the management of melanoma patients. Imaging guides a wide range of indications, ranging from early detection of malignant lesions to response assessment in advanced metastatic disease.

This Research Topic aims to share disruptive concepts in the field of imaging-guided precision medicine in patients with cutaneous, mucous, or uveal melanoma. The goal is to discuss new concepts and discoveries in the field of quantitative imaging biomarkers, which are derived from a quantitative analysis of data contained in medical images. These results shape the initial treatment decision, assessing tumor sensitivity to treatments, and managing patients in the new era of COVID-19.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
