Message from the Guest Editors

Dear Colleagues,

Thoracoscopy is an increasingly common procedure that provides significant clinical information and therapeutic applications. The procedure allows the physician to biopsy the parietal pleura under direct visualization with high accuracy. Medical thoracoscopy is less invasive, has a comparable diagnostic yield, and may be better tolerated in high-risk patients. In the era of rapidly evolving diagnostics and therapeutics for lung cancer, thoracoscopy will play a pivotal role in evaluation and research. This Special Issue of *Diagnostics* will mainly focus on the advances of thoracoscopy applications in the diagnosis and therapy of early-stage lung cancer.

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)
