

## Special Issue

# Clinical Diagnosis and Treatment of Chronic Pain, Second Edition

### Message from the Guest Editor

Chronic pain is a current public health problem, and countries are spending large amounts of money on its management. Currently, more than 85% of chronic pain problems are non-specific in origin. This indicates that imaging tests do not provide clear information to establish an accurate pathoanatomical diagnosis. We need high-quality research to address the issue of chronic pain diagnosis in order to subclassify patients and try to make better diagnoses and better treatments. This Special Issue is aimed at researchers investigating the diagnosis of chronic pain processes including imaging and neuroimaging tests, somatosensory assessments, clinical prediction models, reviews dealing with chronic pain diagnosis, pain subclassifications, etc., as well as those dealing with chronic pain treatments after a more precise and updated diagnosis with respect to large groupings of chronic pain populations that continue to be labeled under the word “non-specific”. With this Special Issue, we hope to shed light on this important subject where chronic pain itself is already understood as a clinical entity in itself.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
