Artificial Neural Networks in Medical Diagnosis

Message from the Guest Editor

Medical diagnosis provides explanations of different patient's health problems based on the applications of artificial neural networks. To date, several technologies have been proposed to analyze medical data sets and different modality images to make diagnosis decisions. For example, artificial neural networks promise novel combinations of treatment protocols ensuring the most relevant and cost-effective and precisely targeting therapies in clinical medicine. In medical imaging, neural networks have the potential to lead to safer, faster, and more affordable diagnosis compared to using the existing imaging modalities ranging from optical analysis to radiographic imaging and nuclear medicine. This Special Issue is intended to lay the foundation of clinical artificial neural network applications focusing on case studies in medical data and image analysis, discuss several applications of neural network diagnostics with emphasis on personalized medicine, and offer an overview of frameworks for the broader integration of different algorithms in clinical practice.

Guest Editor

Prof. Dr. Ming-Huwi Horng

Department of Computer Science and Information Engineering,
National Pingtung University, 51 Min Sheng E. Road, Pingtung 900,
Taiwan

Deadline for manuscript submissions

closed (31 January 2023)

About the Journal

Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2024).
