# Advances in Diagnosis and Management of Pancreatic and Biliary Disorders

### Message from the Guest Editor

In recent years, we have witnessed remarkable progress in the diagnosis of biliary–pancreatic disorders thanks to advances in endoscopic procedures and image diagnosis (e.g., CT, MRI, EUS, ERCP, cholangioscopy, and pancreatoscopy). The diagnosis of early biliary–pancreatic cancer is a pressing issue, and the aforementioned techniques can increase the chances of early biliary–pancreatic cancer detection; however, there are still significant gaps in our knowledge in relation to the follow-up period and key findings. Advances in endoscopic devices including the EUS-FNA needle can improve the accuracy of malignant disease diagnosis and help us to obtain large tissue samples for next-generation sequencing. Tissue sampling under ERCP is not sufficient; however, new devices and methods can improve the diagnostic accuracy of histological and cytological diagnosis.

## About the Journal

### Message from the Editor-in-Chief

You are cordially invited to submit research articles, short communications, comprehensive reviews, case reports or interesting images for consideration and publication in *Diagnostics* (ISSN 2075-4418). *Diagnostics* is published in open access format – research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited and free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

---

### Editor-in-Chief

Prof. Dr. Andreas Kjaer

Department of Clinical Physiology, Nuclear Medicine & PET National University Hospital, Rigshospitalet, University of Copenhagen, Blegdamsvej 9, DK-2100 Copenhagen, Denmark

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, Inspec, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (Internal Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
