

## Special Issue

# Advance in the Diagnostics and Management of Musculoskeletal Diseases

### Message from the Guest Editors

Pathologies of the musculoskeletal system can and must be addressed by many professionals such as orthopedists, traumatologists, physiatrists, physiotherapists, rheumatologists, geriatricians, radiologists, biologists, biotechnologists, bioengineers and other doctors, health professionals, and basic scientists. Their interaction in a multi- and transdisciplinary approach is very important. The aims of this Special Issue are: (1) to summarize through literature reviews, possibly systematic or meta-analyses, the state of the art of the most interesting and current problems of the musculoskeletal system; (2) offer the most current and innovative research through original articles. Both basic science and clinical papers are welcome as long as they concern diagnostic or therapeutic aspects of the musculoskeletal system.
