Deadline for manuscript
submissions:

15 July 2024

Message from the Guest Editors

This Special Issue will examine the intricate connection between various medical domains and mental health. We aim to spotlight the multifaceted aspects of mental well-being, exploring the interrelation of numerous factors that influence quality of life, stress levels, anxiety, depression, and overall mental health across a range of medical settings. Our objective is to consolidate research and insights that depict the synergistic points of diverse medical disciplines in comprehending and ameliorating mental health. We plan to lay special emphasis on innovative research methodologies, incorporating advanced tools and multidisciplinary approaches to enhance the understanding of mental health concerns profoundly and extensively.

We invite submissions exploring the complex network of elements impacting mental health in different medical contexts, including psychosocial dynamics, neurobiological dimensions, environmental factors, and institutional frameworks that might influence quality of life and mental health. We particularly value studies that provide in-depth analyses, unearth new insights, and suggest actionable interventions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Diseases is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

Diseases is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.8 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2023).
