Deadline for manuscript  
submissions:

**closed (31 October 2019)**

### Message from the Guest Editors

Dear Colleagues,

Millions of patients suffer from some form of chronic inflammatory diseases, with no available cure yet. Inflammation is a defensive body response to various injuries initiated by pathogens, chemicals, and cell damage. Gastrointestinal infections alter the gut microbiome and increase the gut's permeability to toxins. Infections with parasitic, microbial, fungal, and viral agents stimulate the immune response and inflammation. Invasions by pathogenic diseases are linked to the initiation of chronic inflammatory responses and accompanying complications, such as hepatic, pancreatic, cardiovascular, colic, gastrointestinal, and neurodegenerative disorders.

For this Special issue, investigators are invited to submit related original basic, clinical, and translational studies, papers on novel therapeutics and their mechanisms of action, as well as review papers through the Manuscript Tracking System at:

## Message from the Editor-in-Chief

*Diseases* is an international, peer-reviewed, open access, multidisciplinary journal that focuses on the latest outstanding research concerning diseases and conditions. Research articles, reviews, and other contents are released on the Internet immediately after acceptance. This journal aims to cover international conferences and symposia as new targets.

*Diseases* is increasingly gaining acceptance and visibility within scholars, and after only a few years of life, *Diseases* is now also covering specific topics with dedicated special issues. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental)
